

REGCOM-PRO Epos Fraud Detection

- Reducing pilfering from cash register
- Reduce suspicious Transactions such as 'Voids' , 'No Sales' Etc.
- Identify rogue members of staff

THE REGCOM-PRO SAVES YOU MONEY BY KEEPING IT IN THE TILL!

The picture below shows, without a doubt, that not all items passed over the counter were entered into the cash register.

**HOW WOULD YOU KNOW
WITHOUT THE REGCOM-PRO**

COLA 1.10
LAGER 2.50
TOTAL 3.60
CASH 10.00
CHANGE 6.40
07-08-03 12:01
TILL 0005 3956

New Evolution
Now switchable master or slave..
with flash update for better support.

The REGCOM-Pro is the latest in the evolution of the popular VSI line of POS / Cash Register Interfaces from AVE. The REGCOM-Pro, now with larger memory space can hold ALL the AVE Interfaces in one unit with full remote PC or DVR programming for selection and setups and on site firmware updating. Built in RS-232, RS-485, Passive and the new Opto-Isolated selection, gives complete isolation from the POS/Cash Register from the video system. Internal 40 Mhz operation allows for combining the Networking functions of the Hydra, Regcom, Networker or Vnetworker within one convenient unit with looping RJ45's for a seem less solution for multiple till configuration.

The REGCOM-PRO translates data transactions from multiple cash registers and transmits all the data into a single stream for integration to a DVR.

This data can help find suspect transactions. Without the REGCOM-PRO this transaction could have gone undetected as neither a review of the CCTV footage or the till receipts alone would anyone have identified this.

**PROVEN TO DRAMATICALLY
REDUCE THEFT AT THE
POINT OF SALE**

**COMPATIBLE WITH
OVER 400 CASH REGISTERS**

REGCOM-PRO Epos Fraud Detection

- Reducing pilfering from cash register
- Reduce suspicious Transactions such as 'Voids', 'No Sales' Etc.
- Identify rogue members of staff

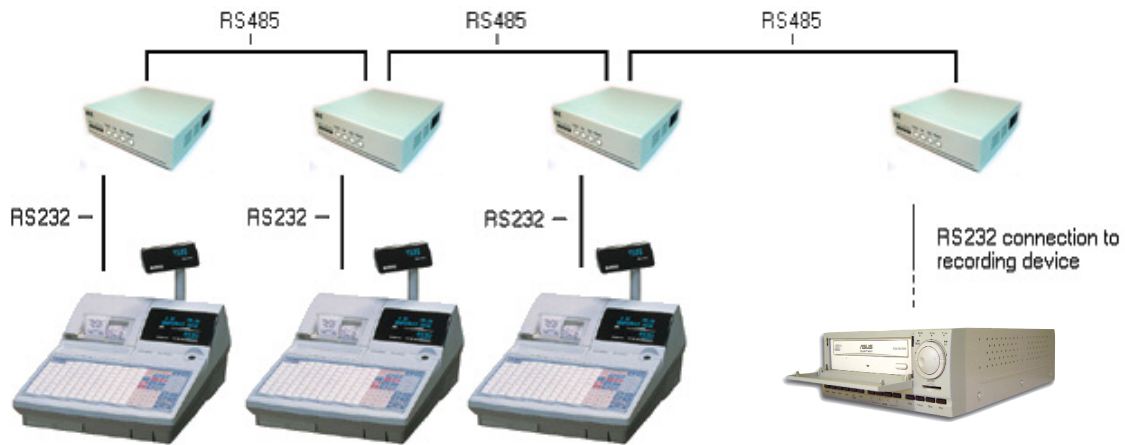

POS / Cash Register Interfacing

An additional Serial Port has been added to allow the VSI-Pro Max to have bi-directional communication with any till emulating common printers, pole displays or customer displays. This additional port can then send the data to the Hydra/Regcom Network or send RS-232 or RS-485 directly to a serial port on the DVR. Optically Isolated RS-232 input selectable has been added to break the ground loop between the POS / Cash Register and the video system. This completely separates the POS / Cash Register system from the video system eliminating till or communication problems or video noise.

Networking

With the built in Hydra, Regcom, Networker or Vnetworker functions, the VSI-Pro Max can be a complete POS / Cash Register interface plus be configured as a Master (Hydra) or Slave (Regcom) device for up to 16 tills. Therefore eliminating the use of the stand alone Hydra, Regcom, Networker or Vnetworker units. Just loop the RS-485 network from one VSI-Pro Max to the next. All VSI-Pro Max will then be configured as Regcom and the last in the loop will be configured as a Hydra and connect to the DVR. Diagnostic LEDs indicate the network active and data from the till is being received to confirm installation wiring. The VSI-Pro Max is programmable for many 3rd party DVR protocol for receiving data from POS / Cash Registers with all the current supported Hydra drivers. Programmability for backward compatibility for all AVE network configurations for Hydra/Regcom, Networker and Vnetworker.

Advanced Functions

- Larger Memory Space
- All AVE interfaces are now in one unit.
- Full remote PC or DVR programming.
- In-built AVE Network(Supporting Hydra, Regcom, Networker or Vnetwork protocols.
- Programmable as Master, Slave or Standalone
- RS-232C Optically Isolated
- Diagnostic LED's for Power, POS Network
- Built in support for over 400 different cash register and other devices, all in one box.
- Built in history of suspect transactions such as 'Voids', 'No sales', 'Returns', and 'Sweet-Hearting'.
- Built in programmable hardware alarms control of external devices.
- Large data buffers to accommodate newer faster registers
- Powerful data filtering algorithms and data export
- Easy set up (60% of set ups are plug and play).
- Largest range of supported devices of any POS / cash register interface.
- Alarms for suspect transactions.
- Built-in test and diagnostic modes
- Upload /Download and Programming via PC or other REGCOM-PRO
- Ongoing development for new devices.
- Bespoke development for (registers/devices) or features not currently available.
